

# Bhanu Palam

Bhanu Palam: Wandering Mind / oil on canvas / 75.6 x 59.7 cm / 2018

## Work Statement

My inspirations come from Astronomy, Cosmology and Spirituality. I explore this rich, vibrant culture reaching for the Ether by guided meditations. Deeply rooted in spirituality to redevelop myself and the evolution of art. There was a constant dialogue on life inquiries. This invaluable information was endowed by the Heavens and will be where art is born.

I belong to two vibrant beautiful cultures. Born in India and raised in New York since age 4. Amalgamating the ideas brought by both culture ancestors were my interest. Henna art application is done by the women of the world. Set on the uncommon vision ideas and style. Learned and was taught through meditations, life experiences, setbacks and self-taught were the beginning stages of rebellion. Keen to innovate by a unique process of manipulating materials. Pushing and directing colour in a way is well suited to the subject. I used this term literally in painting. It was brought to the surface. Being avant-garde and be a part of history is the wish of my soul's legacy. This demeanor will accentuate for a greater good and purpose.

*Bhanu Palam*
